

Dear sal I think that it would be a good idea for you to come down to Santa Fe and Spenser Ave School Santa Fe High school. Maybe you can help us with some of our problems that we have at our school. For example the internet is very slow and I think that would help us do better in school if our internet was better and to help us get internet at home so that all the kids that don't have internet they can have more time on reports and projects so that they will get better and do better at school. Some times kids get bad grades because they don't have internet at school. Just to put some things out there I am not that very good at math but if you come down you can teach me some power and tricks on math and you can tell us how you put and how you know math so good.

but about about me I would think that it would help about other people or kids the teacher at Santa Fe say the internet is slow and that would have happened if one kid had not gave the hole school
